

A **NU** DIMENSION IN TERRAZZO TILE

Natural Finish Specification

Natural Finish should be completed after installation of Nurazzo® Designer Terrazzo Tiles, according to manufacturer's specifications.

Components of **Nurazzo Natural Finish:**

1. **PG2-Cleaner**

Our concentrate hardens and fortifies the surface, increasing longevity of shine. KCI Natural Formula completes the chemical hardening process in surface pores of Terrazzo floor aggregates.

2. **H2O Impregnator**

A transparent, impregnating, water and oil resistant treatment, specifically formulated for Terrazzo flooring. Self-curing and non-yellowing stain protection for tile and grout.

Steps for **Nurazzo Natural Finish System:**

1. Clean any residue and dirt from the surface.
2. Wet vac area thoroughly.
3. Polish the surface, using a 175 rpm buffer and a **KCI #3 Cash Diamond Impregnated Pad**, with **PG2** (4 oz. per gallon of cut water).
****To ensure proper activation of products, it is mandatory to make three passes horizontally, then three passes vertically.**
4. Thoroughly clean and rinse the surface. Allow to dry overnight (No less than 12 hours)
5. Apply first application of *H2O* Impregnator, allowing to dry 45 mins. - 1 hour.
6. Damp mop.
7. Apply second application of *H2O* Impregnator, allowing to dry 45 mins. - 1 hour.
8. Damp mop.
9. Buff the surface, using a 175 rpm buffing machine and the *KCI Gorilla Natural Hair Pad*.
